

# Humus Application

The following infographics illustrate a prototype of our Humus Application.

A.

## A. WELCOME PAGE

Welcome to our Humus App!  
This is the page where both our partners and users can register and sign in to their own interface.

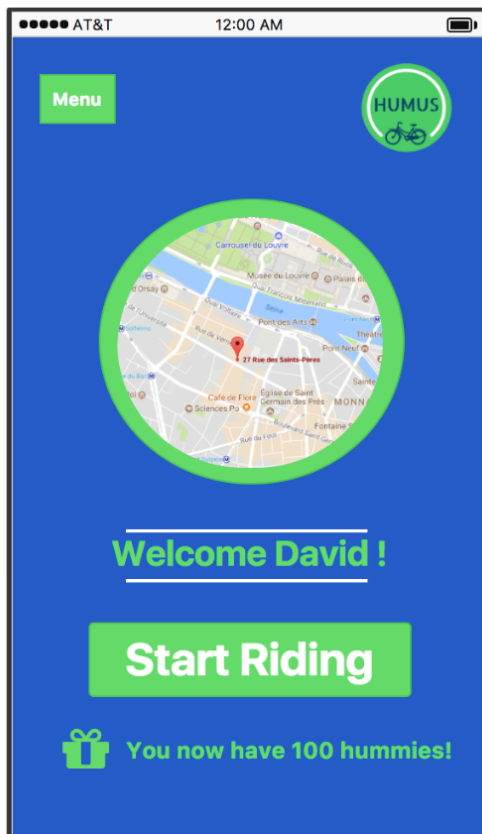

## 1-a. USERS' WELCOME PAGE

This is the user Welcome page. From here you can access the menu, see the surrounding partners on the map and start your ride!

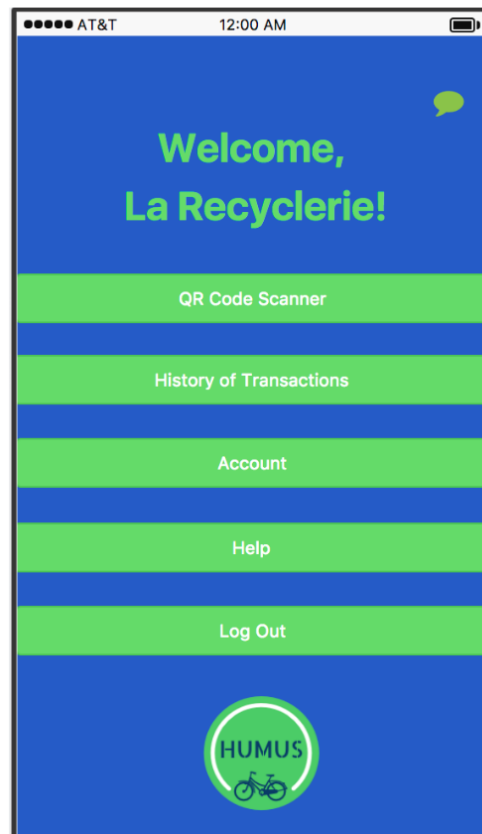

## 2-a. PARTNERS' WELCOME PAGE

This is the Partner's welcome page, with a menu guiding them through the application

# 1. USER INTERFACE

1-a.

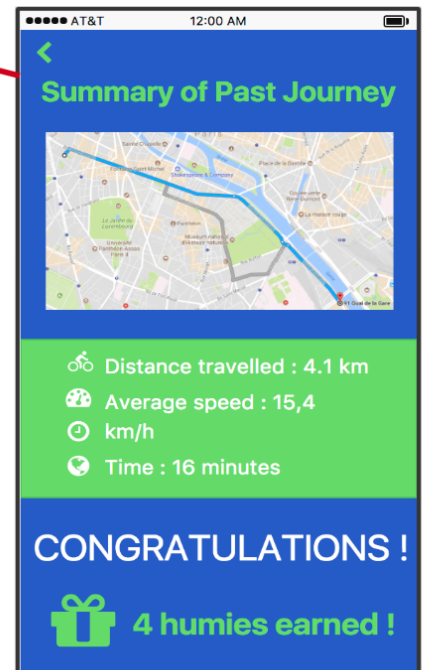

On this page users can see all the local businesses in the area where they can exchange their Humies for discounts.

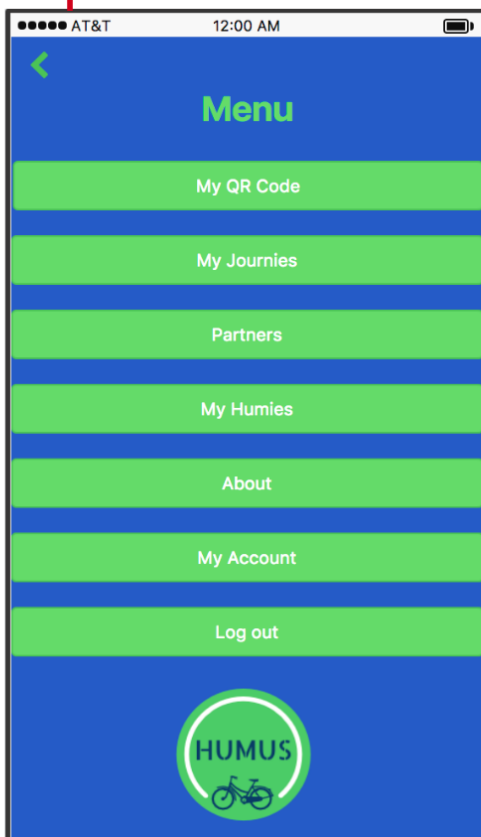

Once users click on "Start Riding", they start their ride and they are redirected to the page above.

The App is connected to the phone's GPS in order to track all the information about the journey: distance, speed, time, and CO2 saved. At the same time, the Humies earned are being calculated depending on the distance covered.

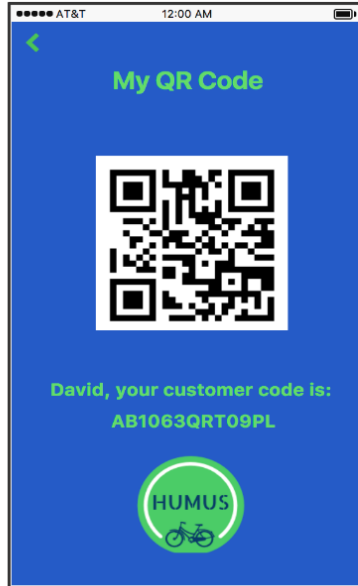

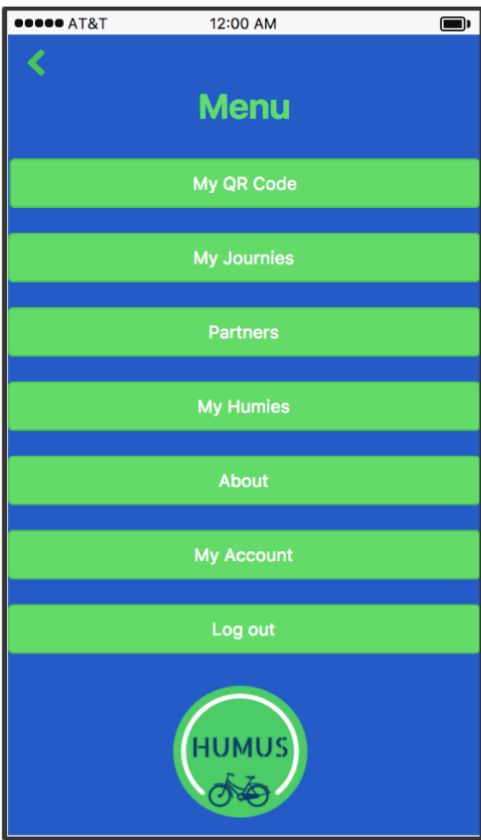

At the end of the ride, user get a summary of their journey and the Humies (points) earned are recorded.

This page allows access to the different functionalities of the App, which are presented in the following pages.

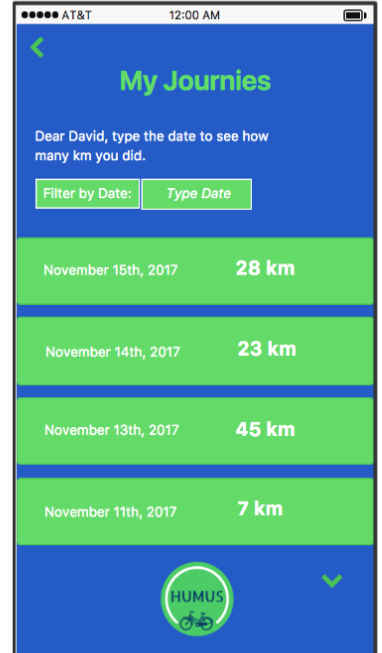

1-b.  
1-c.  
1-d.

1-f.

1-b.

Once Humies are earned and recorded, users can show their unique QR code to the partners in order to use their rewards and track each transaction.

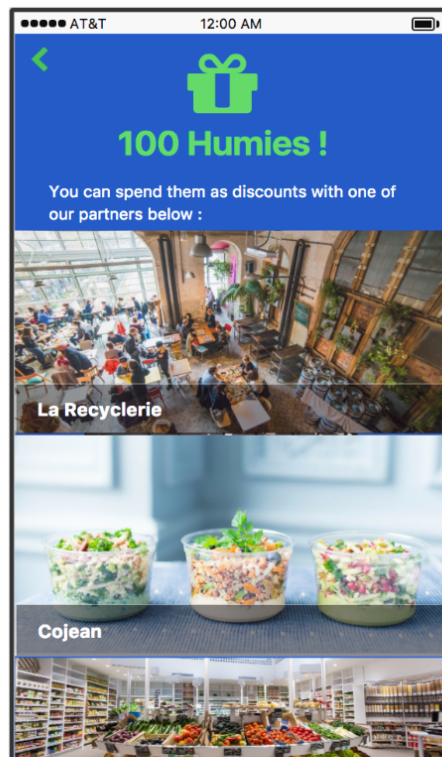

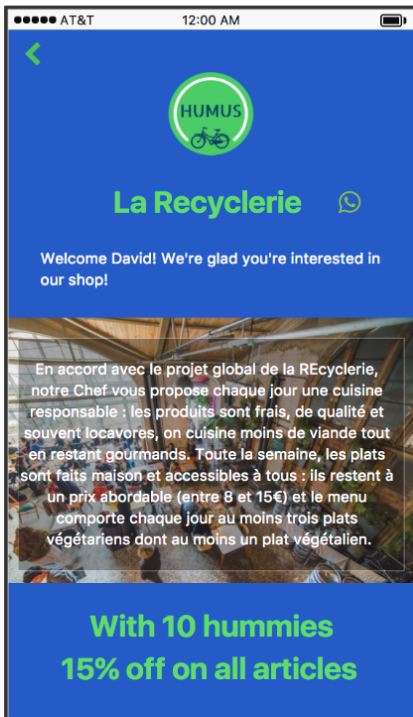

This page keeps track of all the past journeys so that the users can see their data. Users can also search for a specific journey by date.

1-d.

1-c.

The menu option 'Partners' gives the users access to all the information relevant to each partner: namely, the partner's profile as well as the discount details. Here, you can see an example of what this page would look like for our partner La Recyclerie.

This page shows how many Humies users have earned as well as the partner stores where they can use their Humies.

The About section describes the mission and vision of the Humus App for our users

## 2. PARTNER INTERFACE

This page allows partners to scan the clients' individual QR code. In this way, partners can keep track of all the transactions performed. At the same time, they can receive information about the counterpart of the transaction.

2-b.

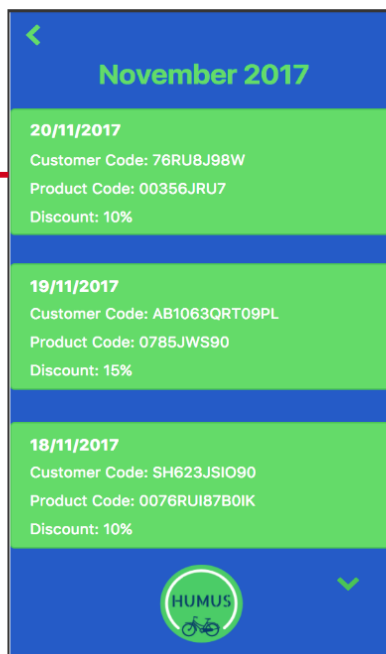

2-d.

2-c-i.

This menu option provides access to past transactions. It is possible to filter by date in order to see the transactions performed in a specific day.

2-c-ii.

By clicking on a month, partners can see the details of each transaction recorded in the App in that month.

On this page partners can see the instructions of Humus App. They can also access our contact information in case they need further help.
