

WHAT IS IT ?

an emblematic bird in Paris but since 13 years, its population is decreasing

according to the Centre ornithologique d'Ile-de-France and the Ligue pour les oiseaux, more than 73% of the sparrow has disappeared in Paris (especially in the South and the East of Paris) between 2003 and 2016

also endangered in London & Geneva : it has even been put on the red list of endangered species in the UK

THE SPARROW

WHY IS IT ENDANGERED?

Because of the urbanization, they find less food. They also cannot build their nest in the cavities due to the renovation of old Parisian buildings.

THERE ARE SOLUTIONS !

- set up nesting box
- avoid using pesticide
- preserve a wild vegetation inside Paris
