## THE GREAT TRANSITION - RESPONSABILITY, INNOVATION, COMMONS

 *Annonces*

### Séance 01

 *The Meaning of the 21st Century*

**By James Martin**

We are at an extraordinary crossroads of human history. Our actions, or failure to act, during the next 20 years will determine the fate of the Earth and human civilization for centuries to come. This is a make-or-break century.

Humanity's demands on the planet are growing rapidly. If we are able to make the planet and civilization work, we face a magnificent future. If we fail, we could be headed for a new Dark Age. This book describes what will make the difference. See more [here](#).
